

bellaform
the better solution

MACHINES AND EQUIPMENT
FOR PLASTIC PROCESSING

**Servo cutter with a tool-free quick-change system
and automatic cutting guide detection**

For the effective cutting of your products

The cutting guide detection works via coded sensors.
The system detects when a different guide is needed.

Equipment features:

- + **Tool-free quick-change system** for the cutting guide
- + **Blade heating / blade cooling**
- + **Optional:** Spraying of the blade with coolant / lubricant
- + **The cutting guide detection works via coded sensors,** that are embedded in the guides. Thereby, the product is assigned the correct cutting guide from the product list.
- + **Scrap cuts:** Production rejects are selectively removed via a pneumatically actuated slide or at the end of the transfer belt.

quick-change system

EVERYTHING FROM A SINGLE SOURCE

Our integration into **PÜTZ GROUP** and the resulting **synergies** have enabled us to offer the matching inspection technology for inspecting surfaces and dimensional stability in addition to the machines and systems for plastic processing.
