

Small screen for the sieving of granulates

Ultra-pure, contamination-free, preparation of feedstocks for MIM/CIM

A compact small screen separates disturbing dust and small particles from the granulate. The associated thyristor control optimally adjusts the vibration amplitude to the material being screened.

We would also be happy to retrofit your existing Bellaform shear roller mixing system with it. Please contact us!

Your benefits:

- + Modular design
- + Low space requirement
- + Easy cleaning
- + Toolless screen lining change
- + Vibration amplitude infinitely variable via thyristor control
- + Can be integrated into process sequences via control system
- + Low maintenance

Everything from a single source

Thanks to our integration into the **Pütz Group** and the resulting **synergy effects**, we are able to offer you not just machines and systems for plastic processing, but also the appropriate test technology to test surfaces for dimensional accuracy

We offer comprehensive services and know how:

Extrusion plant:

- Mono extrusion lines
- Multi layer extrusion lines
- Smooth pipes up to Ø 50 mm
- Corrugated pipes up to Ø 58 mm
- Own Technical Center

Shear roller mixing systems:

- Melting
- Homogenising
- Dispersing
- Compressing
- Granulating

Service:

- Joint product development
- Advice
- Development
- Maintenance
