

For pipes and tubes in continuous and discontinuous operation

Equipment features:

- Cutting guidance with quick-change system
- Scrap cutting
 Production rejects are ejected either via a pneumatically switchable slide or at the end of the deposing belt
- Reinforced design for cutting plastic pipes with larger diameters and and thicker walls
 Outer diameter: 1 – 40 mm
 Wall thickness up to 2.5 mm

Optional:

- Spraying the blade with coolant/lubricant
- Intelligently controlled take-off conveyor
- Blade heating / blade cooling

Your benefits:

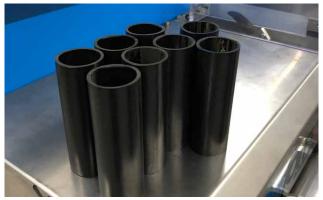

- A variety of cutting devices to suit your production needs
- Can be freely combined with any of our stacking and packaging systems
- Fast integration in your extrusion line

Details:

Cutting guidance with quick-change system.

Thanks to the **reinforced construction** of the machine frame, cutter bar, cutter holder and servo motor, larger and thicker plastic pipes can also be cut.

- Delivery table with continuously adjustable take-off speed
- Ejector table with adjustable ejection delay
- Flexible drop positions
- Orderly depositing of assembled/cut-to length products
- Sorting, counting and picking in different storage positions
- ✓ Buffer storage in the extrusion line
- Rejection of products that are outside the specified tolerance (scrap cut)

Technical details:

Servo-Cutter	
Length x Width x Height (mm)	600 x 800 x 2,000
Max. outer diameter (mm)	40
Max. wall thickness (mm)	2.5
Drive servo motor (kW)	11.9
Operation	Continuous and discontinuous
Cuts/min	4,000
Adjustable cutting length (mm)	20 – 6,000
Rotation speed (cutting speed 1/min)	800 – max. 4,000
Max. supply speed from the belt extension (m/min)	120

Everything from a single source

Thanks to our integration into the **Pütz Group** and the resulting **synergy effects**, we are able to offer you not just machines and systems for plastics processing, but also the appropriate test technology to test surfaces for dimensional accuracy.
